

There's an App for That!

Circles of Life Conference 2015

April 30 – May 1

Stevens Point, WI

A resource list of useful apps for individuals with disabilities:

- | | | |
|---|--|---------------------------------------|
| 1. Personal Health Records | 12. Visual Schedules | 21. Mind Mapping / Graphic Organizers |
| 2. Symptom / Condition Trackers | 13. Materials Modifications | 22. Outline Development Apps |
| 3. Medication | 14. Habit Developer / Behavioral Modifications | 23. Word Finding / Aphasia |
| 4. ICE | 15. Alternative Onscreen Keyboards | 24. Text-to-Speech |
| 5. Caregiver-to-Caregiver Communication | 16. Abbreviation-Expansion | 25. Note taking |
| 6. Time Management | 17. Word Prediction | 26. Reference |
| 7. Visual Timers | 18. Handwriting Recognition | 27. Math |
| 8. Reminder Apps | 19. Voice Control | 28. Miscellaneous |
| 9. To Do List | 20. Speech Recognition | 29. App Publishers |
| 10. Step-by-Step Instructions | | 30. App Reviews |
| 11. Schedules | | |

There are thousands of applications or “apps” available smart phones and tablets. For mobile devices, there are three major operating systems (OS) available: Apple, Android, and Windows Phone. Our presentation and this resource list focus on Apple apps (iOS) because these are the devices we own and use. If you use a different OS, you may be able to find the same or similar apps for your operating system.

This is not an complete list of categories of apps for individuals with disabilities, nor is it a complete list of apps. I have tried to pick out categories of apps that will be useful to individuals who struggle with a wide range of learning issues.

I have included apps which we use, or which have many favorable reviews and are included on “must-have “ lists. Because of the number of apps included, we have not been able to vet each app individually. I have included a list of app review sites at the end of this document for your further evaluation.

I have not included communication apps because the number of apps available is extensive, and users who can benefit from such apps should work with a augmentative communication specialist to ensure they are matched with the best app for their needs.

The prices and availability subject to change without notice. The information included on this list was accurate as of 4/27/2015.

1. Personal Health Records

Care Zone

<https://carezone.com/>

Always have a list of medications, dosages, and schedules with you. Receive reminders, record doses taken, and track adherence progress over time. Document symptoms for easy reference during medical appointments, record doctor's instructions, and privately share updates with family members. Keep track of medical appointments, therapy sessions, and prescription refills.

Free | iPad

Healthspek

<http://www.healthspek.com/>

A free tool that allows you to easily track, collect and safely share your personal and family health records, manage medications and store legal documents. Your record resides on your iPad and is stored securely on Healthspek's cloud-based servers. So if you lose your iPad, you'll never lose your chart! Tell any doctor to go to www.chartnow.com and type in your 8-digit Access Code. Instantly your chart appears.

Free | iPad

Note – Many providers with EMR (electronic medical records) offer free apps for their clients. The two listed above are for anyone, regardless of insurance or clinic.

2. Symptom / Condition Trackers

Chronic Illness Assistant

<http://www.chronic-illness.com/>

The Chronic Illness Assistant has been built to help the day to day lives of people with chronic illnesses. The system consists of two parts, this app and the Chronic Illness Assistant website. This app lets you track all aspects of your care including treatments, symptoms, activity and food intake. An account on the www.chronic-illness.com website is required to use this app.

Free | iPhone/iPad

Seizure Log

http://www.seizuretracker.com/iPhoneApp/Seizure_Diary_iPhone.php

Logging seizures and keeping good records is an essential skill for managing epilepsy and it has never been easier! App users can time and videotape seizures simultaneously in this revolutionary and simple-to-use application. When you stop the video and timer, it immediately creates an event log that is stored in a seizure library. You can also use this app to log seizures without videos attached.

Free | iPhone

AsthmaMD By Mobile Breeze

<http://www.asthmamd.org/>

AsthmaMD is the original asthma research app. Keep a journal of your asthma easily and quickly. Visualize your asthma activity on a color graph. Share asthma diary and color graph with your physician.

Track how medication is helping you manage asthma. Instantly map your PFM to severity zones.

Track asthma triggers such as: Allergies, Pollens, Pollutants, etc.

Free | iPhone

3. Medication Reminders

MedCoach Medication Reminder

<http://www.greatcall.com/medical-apps/Medcoach>

MedCoach is an easy-to-use medical app that helps you remember to take your medications and pills at the right time and day. MedCoach can also connect to your pharmacy to refill your prescriptions. MedCoach is medication management and a medication reminder made easy.

Free | Android, iPhone/iPad

Dosecast

<http://www.montunosoftware.com/products/dosecast/about/>

Dosecast is the most flexible and easy-to-use app for the iPhone, iPod Touch, and iPad to help you remember to take your medications or vitamins on time. Dosecast reliably sends dose reminders with or without an internet connection.

Free | Android, iPhone/iPad

RxmindMe Prescription / Medicine Reminder and Pill Tracker

<https://itunes.apple.com/us/app/rxmindme-prescription-medicine/id379864173?mt=8>

RxmindMe is a reminder app for your medications, vitamins and supplements. It allows you to enter all your dosage information, set up reminders and keep track of when you take them. Ability to search the entire FDA Drug Database for your medications. All of your prescription information is secure and is only stored on your iPhone. You can even protect it with a passcode.

Free | iPhone

4. ICE – In Case of Emergency

Uses iPhone/iPad wallpaper to include emergency information if your phone is locked.

ICE Standard with Smart911™

<http://emergencystandard.org/>

ICE Standard applications can help save your life by putting your emergency health information on the lock screen of your phone so EMTs can get it as quickly as possible, and by working with Smart911™ so that if you call 911 while in a Smart911-enabled community operators get your med information automatically.

.99 | iPhone

Emergency Contact

<https://itunes.apple.com/us/app/emergency-contact/id318518131?mt=8>

Have important emergency information available at a glance on your iPhone or iPod touch's wallpaper. Let an emergency responder find your ICE (In Case of Emergency) info quicker--even if your iPhone uses the security lock. Quickly customize any photo to add your name, contacts, and medical information. Even add an identification photo. Then set the customized image as your iPhone's wallpaper.

Free | iPhone

5. Caregiver-to-Caregiver Communication

Care for Me

<http://www.careappsaustralia.com.au/>

Care for me allows all care requirements to be recorded and reviewed in video, photo or text format. All needs are recorded within categories to provide clear and easily accessible instructions of the cares required.

2.99 | iPhone/iPad

About my day

<http://www.canassist.ca/EN/main/programs/available-apps.html>

About My Day allows caregivers, family members and health-care professionals to make notes about the daily events and experiences of an individual with whom they are working throughout the day. This app is designed to replace paper journals that are often carried in a binder.

Free | iPad

VitaCare

<https://itunes.apple.com/us/app/vitacare/id550115994?mt=8>

A unique software product that allows caregivers, either personal or professional, to maintain constant communications with their loved one (or client). This constant contact significantly enhances the quality of life and independence of seniors, particularly those with memory limitations, who require more support than is allowed by the busy schedules of the caregiver, or by the distance that separates loved ones.

9.99 | Free

NOTE: Health Dashboard – for iOS8

<http://www.knowyourmobile.com/mobile-phones/apple-ios-8/22916/ios-health-app-how-you-use-it-properly>

“The idea behind Health is brilliant: it acts as one centralized hub or dashboard for all your health data from various third-party health apps, like wireless body scales, run trackers, sleep monitors, and more. Instead of opening up all these individual apps they feed all your health data to the Health app via a [new framework in iOS 8 called HealthKit](#). The Health app, in turn, allows these third-party health apps to access your health data from other apps so each individual app can get a better picture of your overall health.”

6. Time Management

30/30

<http://3030.binaryhammer.com/>

A more fast-paced and modern version of the above, 30/30 allows you to set timers to complete specific tasks. The interface is sharp and innovative, allowing users to control the app easily with swipes and gestures. 30/30 can also give you a better understanding of how long it *really* takes to do certain things.

Free/ In-App Purchases | iPhone/iPad

Min To Go

<http://neuronindustries.com/>

MIN TO GO is a timer and alarm app featuring three pre-alarm notifications. While most timers and alarms play lots of sounds, MIN TO GO will announce, "60 minutes to go," "15 minutes to go," and "5 minutes to go." Each announcement begins with a few pleasant tones, followed by a calming female voice. The remaining minutes are displayed right on the app's icon.

.99 | iPhone/iPad

7. Visual Timers

Time Timer

<http://www.timetimer.com/>

This app displays time as a red disk that quietly gets smaller as time elapses. Children as young as three understand that when the red is gone, time is up! Highly recommended by experts in professional organizing, healthcare, ADHD/ Autism and parenting.

2.99 | iPhone/iPad, Android

Vis Timer

<http://mindfultools.gnoup.com/>

Visual thinkers, especially when they are children, have difficulty conceptualizing time. The VisTimer was developed to provide a gentle implementation of time imposed limits. It utilizes an animated shrinking pie chart to depict elapsed time.

1.99 | iPhone/iPad

8. Reminder Apps

Due

<http://www.dueapp.com/>

A to-do list might help you keep track of tasks, but only if you remember to look at it. Written notes can't sound an alarm when it's time to walk the dog or go to your next meeting, but the Due app can. This easy, fast app lets you set up reminders in a matter of seconds. 4.99 | iPhone/iPad, Desktop

Voice Reminders

<http://www.gzero.com/>

Your reminders, in your voice, in your words, delivered on time, every time. Remember everything, forget nothing with this voice 'to-do' list. Simply speak your personal memo, set the time and date, be reminded in your voice. No need to type text! Using Apple's local notification technology, VoCal fuses a Dictaphone, Calendar and Alarm system into one.

Free | iPhone/iPad/iTouch

9. To Do List

Clear

<http://realmacsoftware.com/clear>

Clear is the revolutionary to-do and reminders app that makes you more productive. Simple gesture-based design that allows you to focus on your to-dos, use separate lists to organize every aspect of your life.

4.99 | iPhone/iPad, Desktop

Remember the Milk

<http://www.rememberthemilk.com/>

Take your to-do list anywhere with this feature-packed app; never forget the milk (or anything else) again. Remember The Milk is everywhere you are: from mobile to the web to apps including Outlook, iCal, Gmail, Google Calendar, Twitter, and more.

Free | Android, Blackberry, iPhone/iPad, Desktop

Any.do

<http://www.any.do/>

Any.do is an all-in-one life manager. Save time organizing your family tasks, work projects and personal todo's in one place, while collaborating with others to be more productive. Our task planner key features include: seamless cloud sync, speech recognition, customizable time and location reminders, shared tasks, multimedia notes, and gesture support.

Free, In-App Purchases | Android, iPhone/iPad, Web, Desktop

Finish

<http://getfinish.com/>

The self-styled "To Do List for Procrastinators", what's special about this one is the feeling of achievement it strives to give you. When you finish a task, simply swipe over it and gain a checkmark, along with a nice rewarding sound. In addition, all your completed tasks are automatically archived, so you can finally stop rifling through your laundry in search of those old paper lists.

Free | iPhone/iPad

Priority Matrix

http://www.appfluence.com/priority_matrix_ipad_detailed?support-pm-ipad

Priority Matrix is a powerful, yet easy-to-use task-management tool that's ideal for ADHDers who need to see their tasks. Sort tasks into one of four quadrants: Critical and Immediate, Critical but not Immediate, Not Critical but Immediate, and Uncategorized. Manipulate the size/colors of each section, add icons, and select the percentage completed. You can indicate due dates, start dates, and repeat dates with push notifications.

Free | iPad

10. Step by Step Instructions

Stepping Stones

<http://www.getshinythings.com/>

Stepping Stones is a personal visual organizer for prompting daily routines and schedules. Designed for users with developmental disabilities, this user-friendly app assists in building independence. The simple interface allows a caregiver to create a routine, or 'Path', for the user to follow. The Path then works as reminder with visual and audio guides to act as prompts.

.99 | iPhone

CanPlan

<http://www.canassist.ca/EN/main/programs/available-apps.html>

CanPlan promotes independence and builds confidence by helping people with cognitive challenges complete tasks successfully. Virtually any activity can be broken into a sequence of easy-to-follow steps, illustrated by photos and reinforced with optional text and audio. Scheduling and reminder features ensure each task gets done on time.

14.99 | iPhone/iPad

Can Journal

<http://www.canassist.ca/EN/main/programs/available-apps.html>

CanJournal is a software app that allows users with memory challenges to record their milestones and setbacks on an iPhone, iPod Touch or iPad and play them back later so that they can retrace their recent past. When the app is selected, buttons appear on the screen: for recording videos, shooting photos, playing and sharing them, and labelling new entries.

Free | iPhone/iPad

GoalPlanDo

<https://itunes.apple.com/us/app/goalplando/id961194974?mt=8>

GoalPlanDo brings a simplified method for completing a project right to your tablet or phone. This step-by-step method of planning guides the user with ease to executing a long term project from conceptualization to completion. GoalPlanDo makes project management simple. Adaptable for children and adults. This application is designed for all audiences, however it is beneficial for individuals with Intellectual/Developmental Disabilities, Autism Disorders, Traumatic Brain Injuries (TBI), and Frontal Lobe Disorders.

1.99 | iPhone/iPad

11. Schedules

Peek Calendar

<http://www.peekcalendar.com/>

Peek is a quick and simple to use calendar for your iPhone. It is designed to be glanceable and intuitive. Peek presents the essentials in a easy to understand manner, without overwhelming you with data you might not need for an on-the-go experience. Life can be stressful, why not managing it in a slightly more playful way. Peek is designed to offer a fluid, fast and fun way to have a glance at your schedule. 2.99 | iPhone

Sunrise Calendar

<https://calendar.sunrise.am/>

Sunrise is a free calendar app made for Google Calendar, iCloud and Exchange. Reminders. Timezone Support. Facebook Events and Birthdays included. See faces and profiles of people you are meeting with using LinkedIn. Weather forecast based on your location. Smart icons. Tag location to events. Use Google Maps for Directions. Connect multiple Google Calendars.

Free | iPhone/iPad, Android

iStudiez Pro

<http://istudentpro.com/>

iStudiez Pro is the unique application for students which combines tracking schedule, homework and grades with a delightful user experience. Syncs data with iOS and Mac OS versions of the app. Supports Windows 7-8.1.

2.99 | iPhone/iPad, Mac, Windows

Class Timetable

<http://icemediacreative.com/portfolio/>

Class Timetable is the perfect companion for school, college or university. Keep track of classes and add events to your week's schedule with ease. Swipe left and right to see what's coming up in your schedule, or rotate your device to see your timetable presented in a beautiful week display. KEEP TRACK OF HOMEWORK - with a built in task list, you can do more than just manage your schedule. Keep track of when your college assignment is due, or easily remember what you've got left to do for your school homework.

Free | iPhone/iPad

12. Visual Schedules

Daily Living Visual Scheduler

<http://gbpapps.com/web/>

A powerful easy-to-use task scheduling calendar . This application was developed to help children establish, organize and maintain a structured schedule of daily activities. This application is designed for autistic and ADHD children, but can easily be used by any child who requires more structure in their daily routines.

4.99 | iPad

iPrompts

<http://www.handholdadaptive.com/iPrompts.html>

iPrompts® contains a suite of visual support tools designed to improve attention to task, increase understanding of upcoming events, smooth transitions to new environments, and empower visual thinkers to stay organized and communicate preferences. Delivering visual supports through smartphones and tablets.

49.99 | iPhone/iPad

Visual Schedule Planner

<http://www.goodkarmaapplications.com/our-apps.html>

A completely customizable visual schedule iPad app that is designed to give an individual an audio/visual representation of the “events in their day”. In addition, events that require more support can be linked to an “activity schedule” or “video clip” to help model the task even further. For individuals who may benefit from visual support to ease transitions, anxiety, or who simply need a way to visually represent their day.

14.99 | iPhone/iPad

Picture Scheduler

<https://itunes.apple.com/us/app/picture-scheduler/id315050461?mt=8>

Picture Scheduler is tasks organizer for people with disabilities. App was optimized for creating and organizing personal tasks for individuals with disabilities. We thought that it would be great to create an app, which can help thousands of people who rely on visual and auditory supports to do their common tasks easily.

2.99 | iPhone/iPad

13. Materials Modification

Modifications are changes in what a student is expected to learn. The changes are made to provide a student with opportunities to participate meaningfully and productively along with other students in classroom and school learning experiences. Modifications include changes in the following: instructional level, content/curriculum, performance criteria, and assignment structure-paper/pencil work.

Worksheet Wizard Lite

<http://literacycentre.com.au/>

Application is useful for parents, educators and schools who work with or have children that are learning to read, have English as a second language or children who cannot communicate vocally and/or have difficulty writing. This application makes it easier for children to respond to text based questions without a need to write. The content for this application is based around the topic of colors. You can change, modify and create their own text and picture based worksheets.

Free | iPad

iAnnotate

<http://www.iannotate.com/>

Use iAnnotate to read, mark up, and share PDF, DOC, PPT and image files! Join the over 1 million users worldwide who say iAnnotate is “an indispensable tool to have,” and “the reason I bought an iPad.”

9.99 | iPad, Android

SnapType For Occupational Therapy

<https://www.facebook.com/SnapType>

Helps students who have difficulty writing. Students can take pictures of their worksheets in class and use the iPad keyboard to type in answers. Images taken are not particularly clean or clear, but offer a quick and easy way for students with good reading and spelling skills to complete worksheets using word processing or speech to text if supported with Wi-Fi or accurate speech recognition.

Free/ 2.99 for Pro | iPhone/iPad

PDF Expert 5

<https://readdle.com/products/pdfexpert5>

The app includes annotation, editing, and management with easy to use built in text-to-speech. Students read a PDF worksheet with text-to-speech and complete the worksheet with the annotation features. PDF Expert can also connect to your Google Drive or Dropbox for easy upload and download.

9.99 | iPhone/iPad

Touch It Up

<http://www.tangledtech.net/>

Change your hard-copy worksheet to a digital page you can mark up, edit and share. Plus you can reuse the worksheets over and over. No more trips to the copier. Keep the work you already created and give it a new life on your digital device.

1.99 | iPad

14. Habit Development / Behavior Modification

MotivAider

<http://habitchange.com/motivaider-for-mobile.php>

It works in the background to cut through the clutter and keep your attention focused on making any particular change you've decided to make. First you decide on a desired behavior and devise a brief personal message that will remind and urge you to engage in that behavior. Next you choose a prompt - either vibration only or vibration accompanied by an alarm.

2.99 | iPhone/iPad, Android

HomeRoutines

<http://www.homeroutines.com/>

Do you forget when to mop the kitchen floor or dust the curtains? HomeRoutines organizes your chores for you and breaks them up into manageable room-by-room chunks, so you never feel overwhelmed. This app makes the mundane more fun by awarding you a gold star for each job you complete. Test yourself by setting the timer and seeing how much cleaning you can get done in 10 or 15 minutes. Once the house is sparkling, review your list of completed jobs and pat yourself on the back — or send it to your housemate as a reminder of just how hard you've worked to tidy up the place.

4.99 | iPhone/iPad

Coach.me

<https://www.coach.me/>

Like a sticker chart for adults, Coach.me helps you build habits. The app combines social networking and a daily chart to help you track when and how often you're doing an action. The ability to tap into a supportive community to give or receive "props" (similar to a Facebook "like") increases the chance that you will take action. Available habits range from "Floss Teeth" or "Clear Clutter" to the more difficult "Wake Up on Time." You also get daily tips and pats on the back for completing tasks.

Free | iPhone/iWatch

Persistence

<http://www.junderoo.com/>

A simple and easy to use goal and habit motivator and tracker. Its smart reminders and views help you set and keep goals and track your habits. Quick and easy to make updates to your progress and interact with your goal data in numerous ways, keep notes with each progress update and keep and journal progress notes, a daily reminder informs you of all goals that need to be worked on for that day, set individual "smart" reminders for a specific time on individual goals and more.

1.99 | iPhone/iPad

Timeful

<http://www.timeful.com/>

Your events, to-dos and good habits all appear on your daily calendar. Create habits that repeat daily, weekly or monthly and track your progress. Schedule your to-dos and habits by simply dragging them directly onto your calendar and get reminders to make progress when the time comes.

Free | iPhone/iPad

15. Alternative Input – Keyboards

Keedogo

<http://www.assistiveware.com/product/keedogo>

Keedogo is designed for children and young students who just started to read, write and type. The simplified layout helps beginning typers to focus on learning rather than being distracted by superfluous functions. Keedogo Plus adds word prediction to speed up typing and build confidence.

4.99 | iPad

ABC Keyboard

<https://itunes.apple.com/us/app/abc-keyboard-alphabetical/id960797038?mt=8>

The ABC Keyboard can help increase computer accessibility and productivity for children, individuals with special needs, and even the average two fingered typist. The alphabetical ordering of its keys empowers those with no traditional keyboard training to more easily use modern computing devices.

Free | iPhone/iPad

Keeble

<http://www.assistiveware.com/product/keeble>

Allows students and adults with physical or vision impairments to type in any app.

Keeble is an iOS 8 keyboard that allows individuals with fine-motor challenges or vision impairments to type in any app on iPad. Switch users will significantly benefit from the optimized scanning layouts. Use Keeble's broad customization options to personalize the keyboard to the user's needs.

14.99 | iPad

EZ Keys

<http://panthertechnology.com/>

The six letters Q,J,V,X,K,Z make up only 2% of the keys you hit. But they take up 23% of the keyboard space. By putting these seldom-used letters on a second keyboard, every other key on your main keyboard becomes SIXTY-FIVE-PERCENT BIGGER! And, instead, you find hitting all the other keys you need is easier. Mistakes are fewer. And typing is faster and less frustrating than ever before. Especially if you have motor issues or disabilities.

1.99 | iPad

One Handed Keyboard

<http://stonelightpictures.com/>

Reach all the letters with just your thumb, especially on the biggest iPhones. Quickly switch between left and right handed typing. Switch between full keyboard mode and one-handed keyboard mode by holding the space bar. Automatic dark and light theme to match the user interface. Customizable color.

1.99 | iPhone/iPad/iPod touch

Blink Keyboard

https://twitter.com/blink_kbd

Blink Keyboard is a one-hand, fast typing, resizable and emoji board. It features: Auto-Correct+, more than just auto-correct; Resizable keyboard: resizable for one-hand typing on larger iPhones; Move cursor gesture: tap move first row to move cursor position; Quick Text: define and insert your frequently used text (eg: email or home address); Dedicated comma, full stop, delete word & clear all key; Long press first row for Emojis (no switching needed!); Word Complete/Suggestions & Next Word suggestions.

Free | iPhone/iPad

Minuum

<http://minuum.com/>

Billed as "the little keyboard for big fingers," an appealing prospect for those with pudgy digits and big-screen devices. Featuring autocorrect in 13 languages, smart word prediction, emoji and color themes, Minuum packs in the best features from our lineup, along with a few other niceties.

3.99 | iPhone, Android

Fleksy the flexible

<http://fleksy.com/>

And then we come to Fleksy — a keyboard brimming with confidence in its ability to understand what you meant to type, not what you actually typed. So it's done away with boundaries between letters. Sloppy typing is positively encouraged here. (On Android, Fleksy even has an entirely invisible keyboard mode.) In addition to an ultra enthusiastic auto-correct algorithm, Fleksy's keyboard supports gestures for selecting an alternative word spelling, or deleting mistyped words. And it lays claim to typing speed records. The keyboard can also be customized in size and color.

Free | iPhone/iPad

SwiftKey for iOS

<http://swiftkey.com/en/>

If you do want to swap the stock iOS keyboard for something not made in Cupertino there's plenty of alternatives to choose from. The SwiftKey predictive engine learns how you write and adapts its predictions to your syntax and slang. A cloud profile feature that lets you connect it with your Facebook and Google accounts so it learns more about your language use, to generate better predictions. Used by Stephen Hawking

Free | iPhone/iPad, Android

Ginger Keyboard

<http://www.gingersoftware.com/ios-keyboard-page>

Ginger takes a different approach than the others on this list by helping you improve your grammar and writing style as you type. Beyond simple predictions, the keyboard is packed with tools to proofread, check your grammar, find synonyms, rephrase awkward sentences, and translate texts into other languages. There's also a dictionary that you can customize with names, locations, slang, and unique words.
Free | iPhone/iPad

16. Abbreviation Expansion Apps

TextExpander

<http://smilesoftware.com/TextExpander/touch/index.html>

Create customized abbreviation shortcuts with TextExpander to help write faster without worrying about spelling errors. Expand custom keyboard shortcuts into frequently-used text snippets.

4.99 | iPhone, Mac Desktop

Brevity

<http://www.underwareapps.com/brevity>

Brevity remembers the frequency of the words you use, so that you can abbreviate them and compose text in record time. It works on the principle that most words can be uniquely identified using less letters than they actually contain and it lets you write them that way. Just start typing a word using the first letter or first consonant and continue writing any letter in the word in the proper order.

.99 | iPhone

Typelt4Me Touch

<http://www.ettoresoftware.com/products/typeit4metouch/>

Typelt4Me Touch is a text expander app for speedier typing on the move. Save time and type what you want to say more quickly using short abbreviations that instantly expand into longer snippets of text as you go along, without missing a beat. Want to type "Best regards"? Just type "br" and leave Typelt4Me to expand it to "Best regards". Create a library of shorthand abbreviations for snippets of text that you use all the time and these will automatically be expanded on the fly as you tap them out on the keyboard.

4.99 | iPhone/iPad/iPod touch

17. Word Prediction

Co-Writer for iOS

<http://donjohnston.com/cowriterapp/>

A writing tool that aids with phonetic/inventive spelling, grammar, and topic-related vocabulary. As letters are typed, Co:Writer predicts the intended word with a selection of word suggestions using powerful grammar-smart word prediction. These suggestions can be read aloud with a swipe. Selecting the intended word places it into the document. For feedback while writing (and after writing) built-in text to speech can be used to read letters, words, sentences, and the entire document.

19.99 | iPhone/iPad

Typ-O

<http://typ-o.com/>

Typ-O is simple and easy to use. To get started just start typing, Typ-O then predicts the word you are trying to type. You can touch the word to accept the predicted word or you can press on a speaker button to have the word spoken using a text-to-speech voice. The word prediction is very good and can help improve spelling. Hearing the sentence read back to you using text-to-speech can also help improve grammar. 4.99 | iPhone/iPad

NOTE: Many related apps include some form of word prediction.

18. Handwriting Recognition

MyScript Stack - Handwriting Keyboard

<http://myscript.com/technology/technical-demonstrations/>

The free MyScript — Stack keyboard app for iOS 8 supports a more utilitarian type of scribbling by letting users draw letters or characters on the screen then transcribing them into text above.

Free | iPhone/iPad/iPod touch

WritePad

<http://www.phatware.com/>

WritePad is a text editor for iPhone that utilizes advanced handwriting recognition input for the English language as well as iPhone keyboard for text entry, and includes spell checker, context analyzer, and standard editing operations such as copy, cut, paste, etc. It recognizes cursive, PRINT, and mixed handwriting styles.

3.99 | iPhone/iPad

19. Voice Control

Vocalia

<http://www.creaceed.com/>

Vocalia is a speech recognition application giving you access to some contents on your iPhone or iPod touch. Voice dialing for the iPhone. Vocalia helps you find your contacts in your address book, and automatically calls the number you want. Searching for songs in the iTunes library for the iPhone and iPod touch.

3.99 iPhone/iPad

Note: You can also use voice control built into iOS including Siri.

20. Speech Recognition

In speech recognition the technology takes spoken words and translates them into type. Speech recognition provides access to computers not only for users who have physical disabilities, but also for those who have constraints related to fatigue, poor handwriting, spatial organization, or spelling. Speech recognition also provides immediate constructive feedback, as users see their own words transformed into written text with correct formatting and grammar.

Dragon Dictation

<http://www.nuance.com/for-individuals/mobile-applications/>

An easy-to-use voice recognition application powered by Dragon® NaturallySpeaking® that allows you to easily speak and instantly see your text or email messages. In fact, it's up to five (5) times faster than typing on the keyboard. You can also dictate status updates directly to your Social Networking applications (Facebook and Twitter) or send notes and reminders to yourself....all using your voice. Free | iPhone/iPad, Android

Voice Recognition – Recorder & Translator, Speak to Text

<https://itunes.apple.com/us/app/voice-recognition-recorder/id534482066?mt=8>

Use dictation to send messages, save notes, update your facebook status, tweet, and send Tumblr. Support multiple languages: English, Chinese, Deutsch, Française, 한국어, 日本語, Русский, Portuguese, Italiano, Español and much more! Free / .99 to remove ads | iPhone/iPad/iPod touch

Voice Assistant

<http://www.quantapps.com/>

Voice Assistant is an easy-to-use voice recognition application that allows you to easily speak and instantly see your text or email messages. In fact, it's up to five (5) times faster than typing on the keyboard. With Voice Assistant you can also dictate status updates directly to your Social Networking applications (Facebook and Twitter)....all using your voice. So when you're on-the-go, stop typing and start speaking – from short text messages to longer email messages, and anything in between. 2.99 | iPhone/iPad/iPod touch

21. Mind Mapping / Graphic Organizers

Mind maps and graphic organizers helps students organize their ideas and understand concepts better. Since an outline is sequential, it can be difficult to work with, especially for students that struggle with the process. Mind mapping is a freer, non-sequential way to organize material, making the process more coherent; in particular for students that may not be process oriented, but visually oriented. Mind mapping is also recognized as an assistive tool where for instance, students with Asperger or dyslexia will benefit from the mind mapping method.

Simple Mind

<http://www.simpleapps.eu/simplemind/>

A Mind Mapping tool that turns your iPad, iPhone or iPod touch into a brainstorming, idea collection and thought structuring device. Free to Try, \$4.99 | iPhone/iPad, Android, Desktop

0.99 | iPhone/iPad

22. Outline Development Tools

An outline shows the order of the topics, their importance and relationship to each other. It is a way to break down material into parts. This information is directed toward a student preparing for a composition paper or speech. This approach can help linear thinkers who are word-oriented (non-visual).

Outline Creator

<http://gentlesoft.net/en/outline-creator/>

Shape the Outline of Your Idea - Outline Processor assist to describe the structure of text. You can create structured list quickly and change in the sequence and composition of the list directly. Helps in many situations creating table of contents of slides or articles and writing down notes of meeting.

Free/1.99 Remove Ads | iPhone/iPad

14.99 | iPad

24. Text-to-Speech Apps

Text-to-speech relieves the burden of decoding for struggling readers, allowing them to focus on comprehension (Wise, Ring, & Olson, 2000) and improving their endurance in completing reading assignments (Hecker, Burns, Elkind, Elkind, & Katz, 2002). Research has also shown that students with learning disabilities identify and correct more errors in their compositions when they use text-to-speech for proofreading (Higgins & Raskind, 1995).

Speak It

<http://www.future-apps.net/>

Have Speak it read your emails, favorite news articles, documents and more while you exit the app and do other things with your iDevice! Copy emails, documents, web pages, PDF files, and more; paste them into Speak it!, and have the text spoken back to you with the highest quality text to speech engine available anywhere. You can even create the same quality audio files of the text to speech which can then be emailed to anyone you like!
