

The Center for Brain Injury Research and Training Presents:

The role of the SLP in multidisciplinary concussion management for adolescents experiencing persistent concussion symptoms

Jim Wright M.A., CCC-SLP

Summary: Jim Wright is a doctoral student and clinical supervisor for speech pathology graduate student clinicians at the HEDCO clinic within the College of Education at the University of Oregon. Jim's research interest is multidisciplinary concussion management.

March 17th 3:00-4:00 PM PST

Learning Objectives

1. Identify the required multidisciplinary practitioners for effective and coordinated concussion management.
2. Describe the models for coordinating integrated care in different contexts including school-based coordination and medical-school coordinated communication.
3. Describe the range of available SLP-delivered treatment options to address ongoing symptoms disrupting return to learn, play, and community function.

Participants will be encouraged to actively provide information and solutions to questions
